

7/26/1999

On Friday, July 23, 1999, Chris initiated a conversation at an after work function with Kristi and myself. He began by stating he had a story to tell us. He then hemmed and hawed; saying he couldn't tell us, or shouldn't tell us. He then referred to Kelly and a prior conversation regarding the movie **The Truman Show**. He mentioned the movie was related to his life but said he couldn't say any more and that Kelly knew--she UNDERSTOOD. Kelly said, no, she really didn't get what he was alluding to. He started to tell us that the CIA has been following him for the last 18 years. I asked WHY? He smiled, paused and said "Because I'm special." I sort of detached myself from the conversation at this point. I did hear him say something about being followed and catching them at it (in reference to the CIA). He continued his conversation with Kristi and I tuned out of the rest of it.

Concerns

I believe Chris has some serious social and psychological issues. I am concerned that he could become obsessed, paranoid and/or violent. His belief that Kelly UNDERSTANDS makes me concerned for her safety, so much so that my husband and I went to her house on that Friday night to make sure was safe as Norm was out of town. I am also concerned for the safety of the other employees and myself. We know nothing about Chris or his mental stability. He could be carrying a loaded weapon or be stalking an employee. At best, I believe he is a liar, at worst I believe he is some sort of Schizophrenic. I cannot work with Chris without feeling threatened, nervous and fearful. It is my wish that Chris would be terminated with some sort of law enforcement present and that the office be secured for the remainder of the week so that no one can just walk in the front door without a badge. I would also like employees to be escorted or walk in groups to their cars at night. We don't know exactly what we are dealing with as far as he is concerned; I would rather play the safe side.
