

On July 26, 1999, Rich and Kelly spoke with Chris regarding his interactions with several employees' on Friday evening (July 23rd). Chris informed us of his beliefs of his superior intellect and DNA and that because of this the CIA was after him. He told us that he believed he was to reproduce with hundreds of women, including Celion Dion and Cher. Chris told us that the Truman Show was written about his life and that people were watching him and talking to him by means of the television. He believes that certain people are involved (including Kelly) with the CIA, but he unsure exactly why they wanted him other than for his superior DNA. He also said "spirits" talk with him and tell him what to do he also feels he has psychic powers. He informed us that he would be President of the United States and that Jesse Ventura was to be his running mate. He was told to wait and they would inform him when to run for office.

Chris babbled on, laughing nervously, in a confused state. He didn't know how to explain his situation to us. He did believe that his wife and mother were involved with the CIA, but did tell us they made him go to treatment. We then proceeded to find out where he had been in treatment and Chris willingly offered to sign medical releases for us to obtain the information.

We asked Chris to not talk with anyone other than ourselves about this while we investigated the situation.
