

**United States District Court  
District of Minnesota**

Christopher Roller  
(Plaintiff)

vs.

George W. Bush  
Richard Cheney  
(Defendants)

Civil Action No. 07-cv-1675 JRT/FLN  
Memo to Oppose Motion to Dismiss

Memo to Oppose Motion to Dismiss

Judge Franklin Noel, I have made a blunder. I wish the patent laws were clearer. I do have provisional royalty rights for infringement, but I just don't get to collect until the patent issues (collect for the past dues). Thus I do not have a case for patent infringement at present. I feel silly. So how does God get dough for making this planet Earth and all it's wonderful glory. He amends his FTCA tort to the complaint so he/I has a claim for conspiracy against me.

Defense is complaining because I didn't state a claim against me. Don't I owe it to the world to find out the truth about George Bush. I initiated the suit to get some questions answered about George Bush. Does anybody care about that? Maybe the defense didn't understand my questioning. I'm accusing George Bush of conspiring 9/11 and actually trying to fuel chaos throughout the world with the Iraq war. The deal was to deny the accusations and I would drop this suit. Lack of statements means Bush/Cheney conspired 9/11 and are setting me up as a false prophet.

No facts? Lack of statements to deny the allegations creates the facts in this case. This means that GB is a con man and a killer. Somebody arrest him! I need to see

a declaration or something of the sort to deny my accusations of conspiracy against Chris Roller and the US, otherwise it's true. I assume I can use this case to impeach GB, but since I'm a peon and nobody's paying attention to me, nothing will probably get done. :(

I'm taking on the public entity by taking on GB? I wouldn't argue that. Seems 50% of the people I encounter try to kill me. But is conspiring 9/11 an act of official capacity of GB?

Subject matter jurisdiction - no more patent claim, but the district court can hear FTCA tort claim for conspiracy to commit murder (U.S.C 18 § 1117) on Chris Roller. There may have been a hit on me on the morning of 9/11 which back-lashed as 9/11. Let's open up discovery and find out all of GB's hidden/dark secrets.

## CONCLUSION

Time did tell - 9/11 and the War in Iraq was conspired by George Bush and Dick Cheney under the guidance of the mafia, with godly powers at their disposal, in a quest to try to set me up as a false profit, like I am responsible for these events and everything bad in the world. Bush/Cheney killed 3,000 people on 9/11, and lied under oath, and had godly powers before 1 Jan 2007, thus fraud, and committed treason, resulting in felonies that would be a Violation of Article VI of the U.S. Constitution, qualifying for an impeachable offense per Article II Section 4 of the U.S. Constitution. Of course, these accusations could still be denied in a simple declaration by George Bush. The U.S. has a claim. Somebody do something!

I oppose the motion to dismiss. My claim is now per FTCA claim 28 U.S.C. § 2671, conspiracy against Chris Roller per 42 U.S.C. § 1985 and 18 U.S.C. § 241. Evidence/facts cited by the missing statements of conspiracy accusations, making the claims for relief.

Respectfully submitted,

Date: \_\_18 June 2007\_\_
